Pursuant to 820 ILCS 130/4, public bodies in this County that have active public works projects are responsible for notifying all contractors and subcontractors working on those public works projects of the change (if any) to rates that were previously in effect. Explanations

CHAMPAIGN COUNTY

The following list is considered as those days for which holiday rates of wages for work performed apply: New Years Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Christmas Day and Veterans Day in some classifications/counties. Generally, any of these holidays which fall on a Sunday is celebrated on the following Monday. This then makes work performed on that Monday payable at the appropriate overtime rate for holiday pay. Common practice in a given local may alter certain days of celebration. If in doubt, please check with IDOL.

Any church or school shall also have a classification of Wastewater Service Residential. Wastewater consumption shall be computed the same as water consumption.

Wastewater Service Metered. Wastewater Service Metered shall be available for any customer who has installed a separate meter device for recording the delivery of wastewater to the wastewater system of the Village.

Wastewater Service Commercial. Wastewater Service Commercial shall be available to any single unit commercial establishment, licensed mobile home park and any multiple dwelling unit and/or other premises where more than one (1) residential dwelling unit and/or premises is served by a single water meter. Wastewater consumption shall be computed the same as water consumption.

Wastewater Service Industrial. Wastewater Service Industrial shall be available to any industrial or manufacturing customer who has any unmetered wastewater discharged into the wastewater system of the Village. All wastewater discharge shall be computed the same as water consumption.

Wastewater Service Village. Wastewater Service Village shall be available to any department, board or agency of the Village where a water meter is in service and wastewater is being discharged into the wastewater system of the Village.

Components of the Wastewater Rates

The rates for the use of and service supplied by the wastewater facilities of the Village shall consist of the following components (except as noted on any applicable Schedule of Wastewater Rates then in effect):

1. A demand charge;
2. A volume charge; and
3. A surcharge, if applicable.

Demand Charge. The demand charge is hereby established for the purpose of recovering fixed costs. The demand charge shall be applied to all users, except water usage separately metered for lawn sprinkling.

Volume Charge. The volume charge shall be based on water usage as recorded by any water meter or sewage meter, whichever is applicable, for any wastewater having the following normal concentrations or less:

1. A five day, 20 degree centigrade (20 degrees C) biochemical oxygen demand (BOD-5) of 200 mg/1.
2. A suspended solids (SS) content of 250 mg/1.
3. A phosphorous (P) content of 5 ml/1.

The volume charge shall consist of operation and maintenance costs plus replacement and shall be computed as follows:

1. Estimate the projected annual revenue required to operate and maintain the wastewater facilities including a replacement fund for the year, for all works categories.
2. Proportion the estimated costs to wastewater facility categories by Volume, SS, BOD and P, if possible.
3. Estimated wastewater volume treated.
4. Compute costs per 1000 gallons for normal sewage strength, in terms of 1000 gallons of water used and also in terms of 1000 gallons of sewage discharged to determine the volume charge.

Surcharge. A surcharge will be levied upon all users who discharge wastewater that exceeds the normal concentrations for BOD-5 (200 mg/1) and SS (250 mg/1). Beginning May 1, 2014, a surcharge will also be levied upon all users who discharge wastewater that exceeds the normal concentrations of P (5 ml/1). Such surcharge will be based on water usage as recorded by water meters or sewage volume discharge as recorded by sewage meters for all wastes which exceed the 200 mg/1 and 250 mg/1 concentration for BOD-5 and SS, respectively, and the 5 ml/1 for P.

Computation of Surcharge - The concentration of wastes used for computing surcharges shall be established by waste sampling. Waste sampling shall be performed as often as may be deemed necessary by the Village and shall be binding as a basis for surcharges.

Measurement of Flow. The volume of flow used for computing any volume charge or any surcharge shall be the metered water consumption read to the lowest even increments of 100 gallons.

1. If any person discharging wastewater into the public sewers procures any part, or all, of such person's water from any source other than the public waterworks system of the Village, all or a part of which is discharged into any public sewer, such person shall install and maintain, at such person's expense, a water meter of a type approved by the Village for the purpose of determining the volume of any water obtained from any such other source.

2. Any devices for measuring the volume of wastewater discharged may be required by the Village if the volumes of such wastewater cannot otherwise be determined from any water meter consumption records.
3. Any device for determining the volume of wastewater shall be installed, owned, and maintained by such person. Following approval and installation, any such meter shall not be removed, unless wastewater service is cancelled, without the consent of the Village.
